Career Objective

I am a BS Artificial Intelligence student at FAST University, passionate about developing intelligent, data-driven solutions. With experience in model training and automation, I aim to apply AI for solving real-world challenges and driving innovation.

Education

- BS Artificial Intelligence – NUCES FAST University, Islamabad (2023–2027)
Relevant Courses: Programming for Artificial Intelligence, Data Structures, Digital Logic Design
GPA: 2.7/4.0
- Pre-engineering – Punjab College Chishtian (2021-2023)

Skills

- Python
- Machine Learning
- Generative AI
- Data Automation
- Problem Solving
- Communication
- Community Engagement

Experience

1. AI Intern – Software Productive Strategies (June 2025 – Aug 2025)
 - Collected and cleaned data from multiple sources for model training.
 - Assisted in developing and fine-tuning machine learning models.
 - Contributed to automation processes improving data pipeline efficiency.

Projects / Research

1. Healthcare AI Assistant (July 2025)
Developed an AI-powered healthcare assistant that monitors symptoms, suggests possible conditions, and provides health guidance using LLMs, fine-tuning, and a RAG-based database.

Achievements / Extracurricular Activities

- Vice Head, Finance Department – FAST Computing Society
- District Debate Competition – 2021
