Address: [House # 123, Street # 100, Sector XYZ, Islamabad, Pakistan]

Career Objective / Profile:
Enthusiastic Data Science student with strong skills in programming, data analysis, and software development. Passionate about transforming data into actionable insights and developing efficient, user-centered solutions through innovative technologies.

Education:
Bachelor of Science in Data Science, National University of Computer and Emerging Sciences (FAST-NUCES), Islamabad, August 2027
Relevant Courses: Object-Oriented Programming, Database Systems, Advanced Statistics, Data Analysis and Visualization
GPA: 3.06 / 4.00

Intermediate in Computer Science, Scienta Vision College, Islamabad, August 2023

Matriculation, Scienta Vision, Islamabad, August 2021

Skills:
- Programming Languages: C++, Python, R
- Web Development: Node.js, HTML, CSS, JavaScript
- Database Management: MySQL
- Data Visualization: Tableau, Power BI, Excel
- Design & Media: Adobe Photoshop, Adobe Illustrator, Canva

Experience / Internships:
1. Intern, Contour Software – Launchpad Program, Islamabad
   June 2025 – August 2025
   - Worked with the Learning & Development (L&D) department to enhance internal communication and professional expression through content and activity design.
   - Assisted the Product Strategy & IT (PS&IT) department in conducting data analysis, extracting insights, and supporting strategic decision-making through visualizations.
   - Developed an independent project on electricity consumption control, incorporating real-time usage analysis and actionable recommendations for efficient energy use.

Projects / Research:
1. Inflation Forecasting in Pakistan, February – May 2025
   - Designed and implemented ARIMA, Ridge, LASSO, and Elastic Net models in R to forecast inflation using macroeconomic indicators. Achieved high model accuracy measured through Mean Squared Error (MSE) analysis.

Achievements / Extracurricular Activities:
- Volunteer, Rah-e-Haq – Non-Profit Organization — April 2025
